Dear Mr. Cave:

This Office has received plans, as prepared by Timmons Group, for the referenced facilities. The plans entitled "Kennington, Section 2, Aquinton District, King William County, Virginia" include 33 sheets and are engineer stamp dated June 6, 2006. The plans reference the King William standard specifications.

The project consists of installation of 17,000 linear feet of 8-inch, PVC and ductile iron gravity sewer to serve a 177 lot section of a residential subdivision. Flows from this section will go by gravity to the Kennington pump station and then to the King William WWTP for treatment and discharge to a tributary of the Pamunkey River.

The County of King William will own the facilities.

The evaluation of these plans has been confined to technical requirements and design criteria, as stipulated in the Commonwealth of Virginia *Sewage Collection and Treatment Regulations*.

In accordance with Virginia Water Control Law, *Code of Virginia*, 1950 as amended in Title 62.1, Section 62.1-44.19, this letter report is to advise that the previously mentioned plans are technically adequate and are approved by this office.

King William County
Kennington Section 2
Gravity Sewers
21694

One set of the previously described plans with Virginia Department of Environmental Quality approval stickers is enclosed.

This letter provides your authorization to construct the previously described project. This approval is valid for 5 years from the date of this approval letter.

Please be aware that disturbance of any streams and/or wetlands may also require permitting. If you believe that this may be the case, please contact the Regional DEQ Office at 757-518-2000 for further information on the permitting process.

Sincerely,

A handwritten signature in dark ink, appearing to read "Raymond R. Barrows, Jr.", with a stylized flourish at the end.
